

Ammo-Go™ Liquid

Description

Ammo-Go Liquid is a natural product. The active ingredients are pressed and water extracted from the fruits of various species of Citrus and Quillaja (*Quillaja saponaria*).

Ammo-Go Liquid binds ammonia (NH₃), hydrogen sulphide (H₂S) and other unpleasant and noxious gases. The product can be used in places where a reduction in unpleasant smells is desirable, e.g. in stables, slurry gutters, slurry tanks and other tanks where organic waste is stored (e.g. in slaughter houses).

Ammo-Go Liquid is a simple and environment-friendly way of binding these gases and reduce unpleasant smells. The product can be diluted in water and poured over the smelly surfaces, or it can be fogged into the air in smelly places.

Specifications

Content	Extracts of citrus fruits and Quillaja (<i>Quillaja saponaria</i>) with preservatives.
Appearance	Brown viscous liquid. As the product is natural its appearance may vary slightly from batch to batch
Shelf life	Min. 12 months
Storage	Dry, cool (below 30 °C)
Packaging	5 litre plastic pails 20 litre plastic pails

Application and dosage

Slurry: 25-50 ml pr. m³, twice a week until the desired effect has been obtained, thereafter 20-30 ml pr. m³, once every 7-10 days.

Waste water: 4-15 ppm of incoming waste water, continuously.

Smell reduction: To be watered: Ratio of 1:10 (Ammo-Go Liquid: Water).
To be vaporized: Undiluted or in a ratio of 1:2 (Ammo-Go Liquid: Water).
