Ammo-Go™ Powder

Description

Ammo-Go Powder is a natural product. Its active ingredients are pressed and water extracted from various species of Citrus, which are standardized, preserved and thereafter ad- and absorbed on mineral carriers.

Ammo-Go Powder binds ammonia (NH₃), hydrogen sulphide (H₂S) and other unpleasant and noxious gases. The product can be used in places where a reduction in unpleasant smells is desirable, e.g. in stables, slurry gutters, slurry tanks and other tanks where organic waste is stored (e.g. in slaughter houses).

Ammo-Go Powder is an easy-to-use and environment-friendly product.

Specifications

Content	Citrus species
Appearance	Yellow, free flowing powder
Shelf life	Min. 12 months
Storage	Dry and free of frost, not over 20° C
Packaging	25 kg paper bags with inner polyethylene lining, 20 bags on a pallet. Bigbags of 1000 kg
