

Quiponin® BS Liquid

Description

Quiponin BS Liquid is a natural soil conditioner for use in agriculture, horticulture and silviculture.

Quiponin BS Liquid may be sprayed directly on the plants or it may be watered onto the ground. The product may be mixed, and sprayed, watered, or spread together with synthetic and natural fertilizers, as well as with synthetic and natural pesticides.

Quiponin BS Liquid contains natural plant extracts from the bark and branches of the soapbark tree (*Quillaja saponaria*) - an endemic tree of Chile and Peru - and tea seed extracts (*Camellia oleifera*). The product contains no synthetic elements, and none have been used during the manufacturing process. It does contain preservatives.

Specifications

Content	Elements of soapbark tree (<i>Quillaja saponaria</i>) and tea seed extract (<i>Camellia oleifera</i>).
Appearance	Dark brown liquid
pH	3,1
Specific gravity	1.1 gram/ml
