

Teawet™ TQ Liquid

Description

Teawet TQ Liquid is a natural soil conditioner for use in agriculture, horticulture and silviculture. The product gives the soil and/or growth media better physical, chemical and biological conditions.

Teawet TQ Liquid may be sprayed directly on the plants or it may be diluted and watered onto the ground. The product may without any problems be mixed, and sprayed, watered or spread together with synthetic and natural fertilizers, as well as with synthetic and natural pesticides.

Teawet TQ Liquid contains natural plant extracts from tea seed (*Camellia oleifera*) and quinoa (*Chenopodium quinoa*). Potassium sorbate is added as a preservative. The active constituents in the product include triterpenoid saponins. The product contains preservatives.

Specifications

Content	Elements of natural plant extracts of tea seed (<i>Camellia oleifera</i>), quinoa (<i>Chenopodium quinoa</i>) and potassium sorbate (E202) as a preservative
Appearance	Dark brown liquid
pH	4
Specific gravity	1.12 g/ml at 20 °C
Concentration	50° Brix
Shelf life	Min. 12 months
Storage	Dry, cool (below 30 °C)
Packaging	5 litre plastic pail 20 litre plastic pail
