

## Teawet™ TQ Powder

### Description

**Teawet TQ Powder** is a natural soil conditioner for use in agriculture, horticulture and silviculture. The product gives the soil and/or growth media better physical, chemical, and biological conditions.

**Teawet TQ Powder** is spread onto the ground or a water extract is sprayed directly onto the plants or added by watering. The product may be mixed, and sprayed, watered or spread together with synthetic and natural fertilizers, as well as with synthetic and natural pesticides.

**Teawet TQ Powder** contains natural plant extracts from tea seed (*Camellia oleifera*) and quinoa (*Chenopodium quinoa*). The active constituents in the product include triterpenoid saponins.
